DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to a system for supplying an internal combustion engine with liquid fuel.

Group II, claim(s) 7-10, drawn to a method of manufacturing a tank.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons.

In the instant case the technical features common to the groups (sealed composite junction with different plastic compositions having an overmoulded seal) are known in the art as demonstrated by the applicant's specification page 1 line 24+, page 4 lines 24-32 and Benjey U.S. Patent 6,484,741 column 2 line 19+.

Because these inventions have been shown to lack unity of invention for reasons given above, and because these inventions have acquired a separate status in the art because of there recognized divergent subject matter, requiring separate searches for each Group, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

An election with or without traverse, must be made by the applicant in replying to this office action.
